ABOUT MYSELF

Junior .NET developer in Tychy — ASP.NET Core, EF Core, WPF. FlowBoard MVP: Clean Architecture, Kanban, SignalR, Hangfire, JWT, 277 unit tests. PatchGuard: WPF diagnostics + AI council, 133 tests. INF.03/INF.04 passed. Available immediately. Hybrid Katowice area or remote within Poland.

WORK EXPERIENCE

Programmer (Internship) 02/2023 – 03/2023
Techcom Tychy, Poland

- Developed and maintained backend features in C# — bug fixes, small modules, and API/data-layer changes.
- Wrote and updated SQL queries (SELECT/INSERT/UPDATE) for reports, lists, and admin-style data operations.
- Worked with relational databases — table design basics, joins, and keeping data consistent with app logic.
- Fixed backend defects found in testing/production; traced issues from UI/API down to SQL when needed.
- Used Git for version control; deployed or tested changes with the team in short iterations.
- Collaborated with frontend on integration; clarified endpoints, payloads, and error cases.

VR/IT Support (Erasmus Internship) 17/03/2025 – 11/04/2025
IE University Madrid, Spain

- Supported live educational sessions using VR headsets in a professional IT environment.
- Prepared, configured, and tested VR equipment before each session to ensure stable, distraction-free delivery.
- Worked alongside an experienced IT support team — troubleshooting issues, assisting facilitators, and keeping sessions on schedule.
- Gained hands-on familiarity with VR hardware setup, calibration, and day-to-day operational workflows.

EDUCATION & TRAINING

Programmer 2020 – 2026
TEB Technikum Edukacja w Tychach Tychy, Poland

- Obtained the professional title of Technik Programista.
- Professional qualifications: INF.03 (Designing web applications and databases) and INF.04 (Designing, programming, and testing applications) — 100% practice skills each.

SKILLS

Languages & runtime	C#, .NET 8/10, SQL	Frontend Tools	HTML, CSS, JavaScript, React
Backend	ASP.NET Core, REST APIs, EF Core, Dapper, SQLite, MS SQL, JWT, Swagger/Scalar, SignalR, Hangfire, Redis, MediatR	Familiar	Git, Visual Studio, VS Code, Docker, xUnit
Desktop & mobile	WPF, MVVM	Soft skills	Angular, Vue.js, PHP, Microservices, Event-Driven Architecture, .NET MAUI
			Team collaboration, clear communication, adaptability, receptiveness to feedback

LANGUAGE SKILLS

Russian	Ukrainian	English	Polish
Mother tongue	Mother tongue	C1	C1

PROJECTS

FlowBoard

.NET 10, ASP.NET Core, EF Core, SQL Server (MVP complete)

- **Architecture:** Clean Architecture + CQRS (MediatR) with FluentValidation; multi-tenant workspaces with RBAC.
- **Real-time & Kanban:** Boards/cards with fractional-index ordering; SignalR (CardMoved / CommentAdded); optional Redis backplane; Dapper reads.
- **Features:** JWT + family-based refresh rotation; comments, tags, assignment emails; Hangfire background jobs; card activity log; write rate limits; Docker Compose (dev + prod); Railway / Azure deploy docs.
- **Testing:** 277 unit tests + 21 integration tests (TestContainers / Docker); CI.

PatchGuard

.NET 10, WPF, MVVM, EF Core

- Windows health & performance desktop: Dashboard, Diagnose, Live Monitor, Game FPS (PresentMon), Optimize, Settings.
- Read-only diagnostics + deterministic health score; live sensors (LibreHardwareMonitor); safe reversible optimizer.
- Optional multi-agent AI council with privacy controls; local rule-based fallback; EF Core SQLite history.
- **Testing:** 133 automated tests. Proof: open-source on GitHub; dotnet run from README.

TaskManagerAPI

.NET 10, ASP.NET Core, EF Core

- REST CRUD API with filtering, sorting, and pagination on list endpoints.
- Input validation and global exception middleware — consistent JSON error responses.
- EF Core + SQLite with seed data; enums serialized as strings in JSON; Swagger/OpenAPI.

Booking System Application

- Full-stack booking app: overlap detection and status workflow (Scheduled → Confirmed → Completed).
- ASP.NET Core + EF Core + SQLite; service-layer validation before save; vanilla JS UI in wwwroot.

WeatherApp

.NET 8, WPF

- WPF desktop dashboard — charts for temperature, humidity, pressure, rainfall.
- Dual API integration: OpenWeatherMap + IMGW; async HTTP with cancellation; date filter; CSV export.
